Subject: Re: Overlaying axes on an image? Posted by kennealy on Tue, 10 Jan 1995 21:02:03 GMT View Forum Message <> Reply to Message Ipoon@Glue.umd.edu (Leon Poon) writes: > Ok, here's the gist of the problem: I have a simple image (binary) > file in which I want to overlay x and y axis. So, what commands > should I use after, say "tvscl, imagearray", to annotate the > image with x and y axis (with the ranges of my choosing, of course)? Just add the /NOERASE option to your plot command! Regards, Jack Dr. Jack Kennealy, Nashua, NH kennealy@mv.mv.com
