Hi,

what would be the fastest way to change this:

[[1,1], [2,3], [1,2], [1,1], [2,1], [3,2]]

into this:

[[1,1], [2,3], [1,2], [2,1], [3,2]] ?

I don't mean: `array = array[:,[0, 1, 2, 4, 5]]` which would be fast, but not very dynamic :)

It should delete every coordinate-tuple appearing more than once without changing the order of the other elements.

Thx for racking brains,

Tom
