Ok, I tried something like these:

PRO DELETE_TEST

```
filename_out = 'e:\GESIMA\test_del2.hdf'  
FileID_out = HDF_OPEN(filename_out, /READ)  
  
HDF_DELDD, FileID_out, 702, 2  
HDF_CLOSE, FileID_out  
  
END
```

Tag 702 and Reference No 2 I got when I checked the hdf file by Noesys.
But I always get the message:

HDF_DELDD: Unable to delete the specified tag/reference pair.

Whats wrong ?

Thanks for your help in advance !

Klemens
