Hi all, i've an array of structures like that:

```
X = 5
Y = 5
Z = 5
dumb_struct = { dumb_struct, a: 0, b: 1.0, c: 0 }
dd = REPLICATE(dumb_struct, X, Y, X)
```

how can i order the array in ONE variable, say something like
dd[* ,3,3] ordered by the "a" value of each element?

it's correct someting like this?

```
dd = dd(SORT(dd[* ,3,3].a))
```

please help me!

thx! vectra...
