Subject: Upgraed to IDL 5.6, now having problem w/ linkimage
Posted by K Banerjee on Sat, 15 Mar 2003 18:00:17 GMT

Folks,

We upgraded from IDL 5.3 to IDl 5.6 and use several functions
from a shared object file. We use LINKIMGAE to tell IDL about
the functions from the shared object file. With IDL 5.3, everything
worked. Now we are getting a core dump with IDL 5.6. Has LINKIMAGE
changed in any wat between 5.3 and 5.6?

Thanks.

K. Banerjee
