---

Does anyone have any substantial information about IDL 6.0? When is the planned release? What will the major differences be between 6.0 and the current version?

All I could find was this page in Chinese... which is still relatively mysterious after babelfish translation:

[http://astron.berkeley.edu/~jhall/export/IDL\\_6.0.pdf](http://astron.berkeley.edu/~jhall/export/IDL_6.0.pdf)
