Subject: VISUALLIZE IT AS IF BURNING THROUGH, SLOWLY
Posted by MC on Wed, 02 Apr 2003 04:28:15 GMT

a=[[3,3,1,1,5],[2,1,1,4,5],[3,5,1,1,2]]

The burn can only go where there are 1's. Allowed to proceed to the next
cell as long as any of its 8 neighbours are connected by 1's.

Start the burn at [3,2].

The front is allowed to go up and to the side, but not down.

How can I simulate the movement of the front?

Thanks,
MC
