
Subject: IDL 5.6 Error

We upgraded to IDL 5.6 (on a RedHat 7.3 computer)
from IDL 5.3. We use a dynamic module. Under IDL 5.3
we did not get the following error message:

```
% IDLVBIO_READ_TIME_SERIES: Unexpected keyword cleanup stack found on
return.
```

The function IDLVBIO_READ_TIME_SERIES, from our dynamic module,
does, indeed use keywords. Any ideas on how I can go about
eliminating this error message. Thanks.

K. Banerjee
