
Subject: ENVI band math: "b1 gt b2 " , "(b1-b2) gt 0" same or not?

I have a strange problem. I often used band math to generate mask, such as "b1 gt 0" will give me 1 to all points which satisfies the condition. But now I want to find all points that $b1 > b2$, I meet unexpected result. If I use "b1 gt b2", I get the correct answer. If I use "(b1 - b2) gt 0", ENVI will also return a result, but I can not guess what ENVI is doing because the result is weird. Can anyone tell me what happened? Thanks
