I think you need to re-read my post to Thomas Gutzler from yesterday. My suggestion to him on how to solve this problem apparently worked wonders. :-)

Well, we have operators standing by to take your calls. :-)

Cheers,

David

P.S. If you want to see an example of a compound widget object, have a look at FSC_DROPLIST, for example:

http://www.dfanning.com/programs/fsc_droplist.pro

Of course, I wouldn't write that program exactly that way *now*, but the essential ideas are there.
