Subject: Re: Not Sure about widget hierarchy ?? Posted by paul wisehart on Thu, 24 Apr 2003 18:12:25 GMT View Forum Message <> Reply to Message

Thanks for the input. It was very helpful.

I was still confused about draw_widgets & windows.

What I ended up doing was to have 2 window/draw_widgets contained in one top-level-base. I think that was suggested to me, but I was still confused about windows & draw-widgets, so I didn't understand.

Thanks for the help!

Now I need to come up with some _real_ assignments for myself so my employers will let me keep doing this stuff!:)
