Hi Chad,

If you want to use vector-drawn fonts instead, there is a very nice sun symbol under the math font:

```
IDL> !p.font = -1
```

```
IDL> xyouts, 0.5, 0.5, '!9n'
```

The !9 switches to math font, and the "n" is the character representing the sun.

You can use:

```
IDL> showfont,9,'Math'
```

to view all of the available symbols.
