Hello,

I'm getting the following message when I try to use PseudoColor depth 8:

```
% Unsupported X Windows visual (class: PseudoColor, depth: 8).  
  Substituting default (class: TrueColor, Depth: 24).
```

IDL 5.5 is installed on an HP-UX 11.0 machine and I'm logging from a Blade 100 running solaris 8 to use IDL. The output of xdpyinfo on the Blade shows that it supports 8 bits color.

Does anyone know what is the problem?

Thank you very much,

Hannah
