Hi,

some of us have to submit powerpoint files.  
It's easy to run powerpoint in wine on a linux box.

May be someone has much more experience in this as I am.  
Who knows a really simple way to convert images or mpeg1 files  
to video for windows on linux.

I know Ronn was able to set up a avi dlm for windows. In the past I was  
believing I could do the same for linux. But this takes to much time at the  
moment. (it's a long moment)

regards

Reimar
