Try the following for encapsulated postscript

```
set_plot,"ps"  
device, filename="file.eps", encapsulated = 1  
...plotting commands...  
device, /close
```

and

```
set_plot, "ps"  
device, filename="file.ps", encapsulated = 0  
...plotting commands...  
device, /close
```

for un-encapsulated postscript. This works fine and allows you to combine the two options in the same session (in arbitrary order).
