Subject: Special Characters in IDL
Posted by David Fanning on Fri, 30 May 2003 16:58:15 GMT

Folks,

Have you ever tried to use special characters in IDL (I'm
thinking specifically of the less-than-or-equal sign) *and*
get them to print in PostScript?

That was just a bit more complicated than I wanted it
to be. (How come there is no reference to "unicode" in
the IDL documentation!?) Anyway, because I don't want to
go through that again, I wrote up a little article about
it. You can find it in the usual place.

Cheers,

David
