Hi Ronald,

A good starting point would be the IDL Advanced Developers Guide (ADG) which is in the standard on-line documentation set. This has some examples . Also, Ron Kling has written a book on linking with IDL that worked nicely for me in C - can't recall if it covered FORTRAN.

I just did a quick search on Google and there are some old newsgroup articles that will also help. Try:

<http://cow.physics.wisc.edu/~craigm/idl/archive/msg05885.htm> I

Good luck!

Dave
