Thanks. Just mark it as described and use [C-c ;]. The same command
uncomments commented sections. You might also find the various
commands to mark and move among sub-blocks and program units useful:

M-C-h	Mark sub-program
IDLWAVE->Mark->Block	Mark block
IDLWAVE->Mark->Header	Mark the header
M-C-n	Move to end of next block (if, case, etc.)
M-C-p	Move the beginning of the previous block
M-C-d	Move down one nested block before point
C-- M-C-d	Move down one nested block before point
M-C-u	Move up to the top of current enclosing block
C-- M-C-u	Move up to the end of the current enclosing block
M-C-a	Move to beginning of current sub-program
M-C-e	Move to end of current sub-program
