Hi,

I created a Array 800x600x1000 and saved this as an MPEGfilm with

```
mpegID=MPEG_Open([nx,ny],filename='Stars_size'+StrTrim(Strin g(size),1)+'.mpg
')
FOR j=0,frames-1 DO MPEG_Put, mpegID,image=mat_save(*,*,j),frame=
MPEG_Save,mpegID
ENDFOR
```

(nx=800,ny=600)

(mat_save=800x600x1000)

but the problem is, that the mpeg file is 852x600

does anyone now, how the parameters have to be set, that the correct size comes out of the routine? it is important, that my file has exactly 800x600

regards

Kay Bente
