hi,

I am trying to train a network using SNNS(I am new to SNNS).Now I have heard of some batch processing thats possible in SNNS and I have posted abt that in the AI group. I would like it if anyone in this group has info on that.

My actual problem is : when i type spawn, 'xgui' i get the following error :
bash:xgui command not found. what is the problem? i have already set up snns using swsetup snns.

bye

m
