Dear all,

I just mentioned the one who asked to do a google search.  
This was a failure. Myself I needed a quarter to find again this article,

I used the following search string, because I remembered that it was an html  
output.

html group:comp.lang.idl-pvwave

"Convert IDL code to HTML with color chromacoding for webpage / printing"  
2003-04-16 03:52:01 PST

The routine is hosted on the rsinc codebank:  
<http://www.rsinc.com/codebank/search.asp?FID=236>
