Ouch, this smells like a request for a copyright violation. I have no clue whether the RSI wavelet toolkit is worth the money (their products tend to be a little pricy :-)), but if you need to use it, you will have to spend the money. However, as fellow member of the newsgroup suggested to look at the web site <http://paos.colorado.edu/research/wavelets/>, and I think this is a good place to start with software in three programming languages! You should be able to find something useful here. Furthermore you have online access to the wavelet toolkit via the ION interface.

Greetings,
Haje
