Subject: rotating 3d array: help for the braindead! Posted by pjclinch on Tue, 14 Feb 1995 17:04:50 GMT

View Forum Message <> Reply to Message

I have a stack of MRI images that make up a 3d array, and I want to turn all the constituent images over.

At the moment, I've got a FOR loop that goes through using

ROTATE(image(*,*,i),2)

on each one, but I'm convinced there must be a better way to do it in a oner without the FOR loop to slow things down. Problem is, the brain's stopped working and has already been a bit overloaded learning widget programming, so if anyone can show me the light, I'd be most grateful.

Thanks, Pete.
