Subject: Starting License on booting - sgi/IRIX4.0.5C Wave/4.1
Posted by root on Thu, 09 Feb 1995 00:18:12 GMT

I've tried everything I can think of to get the license manager
for Wave 4.1 to be started on boot on an sgi running IRIX 4.0.5C.
The previously used methods don't work and I can't get "lmgrd"
to do the job either. If someone knows a method that definitely
works please mail me.

Thanks
