Subject: How to compile excutable .sav file from a project
Posted by jianglan98 on Fri, 03 Oct 2003 21:53:09 GMT

Dear All

I have a porblem to get excutable .sav file from a project with GUI.
When I run my .sav file, it only shows my GUI interface. It cannot
work in other event application.

Does it mean my other event application put in wrong place before
compiling? How to fix it?

I appreciate your help

L Jiang
