
Subject: netCDF problem in IDL 6.0

The following netcdf call worked fine under IDL 5.6, but I get an error under IDL 6.0.

ncdf_attput,id,'BAT file: ',/GLOBAL,file

The error produced:

% NCDF_ATTPUT: Attribute write failed. (NC_ERROR=-59)

After this error, the rest of the file gets written just fine.

Any ideas?

Thanks.
