Subject: Problems with 3D-Plot

Hello together,
I try to make a 3D-plot of atmospheric data, where I used the map_set
command to generate the xy-plane which is in geographical coordinates.
The z-dimension is the height in m. Trying to produce just some cubics
in this space by plotting the edges of the cubic by the plots command
shows just the edges in the xy-plane, but not the edges in xz und yz
plane. The height of the edges in the xy-plane is always ok.
Whats the problem ? Is it because of the inhomogeneous coordinate system ?
Thanks fuer your help in advance !

Klemens
