How can I plot a point into a ENVI's display?

Writing:

```
ENVI_DISP_QUERY, 0,w1=win,fid=fid,x0=x0,y0=y0  
wset, win[2] & plots, 50, 50, PSYM=1, color=255, /device
```

the point is plotted only in scroll window but it's not visible in
zoom and image windows.

thanks
