Thanks relpy.

Sorry, I didn't give detail information.

This area is korea region.

rainfall(k) : ground weather staion

longitute(k) : weather sation longitute

latitute(k) :weather sation latitute

k : number of weather station

example

longitute	latitute	rainfall
-----------	----------	----------

128.140	38.285	21.000
---------	--------	--------

128.383	38.267	4.000
---------	--------	-------

127.306	38.145	22.000
---------	--------	--------

128.210	38.217	30.000
---------	--------	--------

127.951	38.208	30.000
---------	--------	--------

. . .

. . .

. . .

I want to use mecartor map projection and draw contour map in korea region.

Thanks

Park
