Did you find this code on the RSI web page?

(Oh, I'm just kidding...)

I can't tell from the code what exactly you are trying to do. You can find an article on my web page, however, about cascading menu choices (all in their own top-level bases), that can communicate back to the first widget. It looks to me like the principle is the same.

http://www.dfanning.com/widget_tips/cascading.html

Cheers,

David
