duh... i mean.. with the shift in the oplot duh...
yshift = 1
OPlot, x, y2+yshift
I'm pretty big on aesthetics, but I have to admit,
manipulating the data so that it *looks better* gives
me the willies. After my fairly flippant answer this
morning, I think I would agree with JD. Look for
more creative ways to present the *real* data,
not sneaky ways to fix it. :-)
Cheers,
David

What is with an additional axis with small differences in the range?

Reimar
