---

hi all,

I have a simple question. I have a plot, and I would like that x label would not write all number (e.x. 33,34,35,36,37,...) in order to not overwhelm too much my plot. Is there any command to set the interval of number written (e.x. 33,35,37, ...) without changing the range of my plot?

Thanks,

cheers!

S.
