Does encapsulated postscript with /preview work? I couldnt get Aldus Pagemaker, nor Aldus FreeHand, nor Adobe Photoshop, nor Adobe Illustrator to preview it. All seemed ok with the eps, but would not preview, except for Photoshop that gave message:

Could not open <filename> because it is incompatible with Adobe Photoshop and Adobe Illustrator 3.0 EPS format.

Any clues?

ps: IDL. Version 3.6.1 (AIX ibmr2).
