Hi all,

I would like to make a copy of a plot in one window, and put it in a second window. Is there any way to change the dimensions of the rectangle that I copy, so I can place it into a window of a different size? I tried

```
IDL> window, 0, xsize = 500, ysize = 400
```

```
IDL> plot, findgen(10)
```

```
IDL> window, 1, xsize = 600, ysize = 500
```

```
IDL> device, copy = [0, 0, 500, 400, 0, 0, 0]
```

This copies the pixels, but the plot in window 1 is the same size as the plot in window 0. I tried changing the values of copy, but could not get it to do what I want. Is there a way to copy plots to windows of a different size?

Thanks,

mallozzi@ssl.msfc.nasa.gov
