Dear Sir,

I want to draw contour lines on a image.

I wrote some codes as follows:

```
-----
Window, 1, color=256, xs=500, ys=500
Map_set, /Cylindrical, limit=[28,117,42,132], /continents $
      , /hires, Mlinethick=1., /NoErase, /Isotropic
;      , position=[0.05,0.05,0.95,0.95]
TVSCL, Rotate(scan, 7)

; Contour, data, xlon, ylat, /follow, position=[0.05,0.05,0.95,0.95] $
;      , NLevels=20, XStyle=1, YStyle=1, /NoErase, /Overplot

Map_continents, /hires, color=255, /fill_continents, /cylindrical
Map_continents, /coast, color=0, /hires, /cylindrical
; Map_grid, charsize=1.25, color=200, latdel=2, lonel=2 $
;      , /box_axes, GlineStyle=2
-----
```

However, the map continents & coast do not fit on the image.

What do I need to modify?

If anyone know about it, please let me know.

Thank you.

Have a nice day

Son
