Hi folks,

I'm new to IDL, and am hoping to find a book to help me learn how to program(in IDL). The manuals seem to have most of the necessary info, but it's taking me a while and I'd like to get up to speed so I can work on some actual projects. I've called a few local (Philly) bookstores, but no luck.

BTW, what's P-Wave?

Thanks for any advice,
Michael
