
Subject: IDL: how to determine PS page offsets?

If I have changed the default page offsets for Postscript, e.g.,

```
SET_PLOT,'PS'  
DEVICE,/INCHES,YOFFSET=1
```

is there any way of determining the current offset? It is shown in
HELP,/DEVICE

but I can't find a way to make this available to IDL.

/* if I could only redirect the HELP output through awk..... ;-) */

Thanks,
