Subject: Animations: A can or worms?
Posted by Haje Korth on Tue, 17 Feb 2004 17:25:27 GMT

Hi everyone,
I need to bring up a question (again after a year) that David describes as a can of worms: Animations. I need to create a massive amount of animations with IDL. The problem: Animated GIFs are due to license issues not acceptable, the IDL MPEG routines have serious quality issues, and AVI2IDL requires constant interaction. Therefore can anyone update me on state-of-the-art animations creation in IDL?
IMHO, RSI really has to start think about this problem before customers go over to other solutions. Time is moving on and technology advances. Presentation without animations are almost history, and we need a solution NOW!

Thanks,
Haje
