I just solved this problem...obviously some settings were messed up.. so what I do is just calling another idl session with the runnning batch process using SPAWN....

> Hi folks... > > map_set is giving me some headache since days...I'm trying to create > in batch modus under linux some maps (shell script is calling up IDL > and starting the progs). The problem is this > When calling map_set while being in the batch routines with the > following arguments: map_set,47.6445,9.29510,LIMIT=[47.4520,8.77010,47.8370,9.820 10] > > IDL returns: MAP_SET_LIMITS: Warning, MAP limits are invalid. > > > Well, If I just state this command not being in the batch modus: everything is going to be fine.... > > Any ideas? are the !MAP parameters messed up? Is there a way to set > them back to standards? I tried also the SCALE keyword, which works, > but because I got quite a bunch of maps with different scales...no > wav.... > Thanks for your hints in advance... > Dave
