Any experience with writing files to a writable CD on Windows XP from IDL? I have a writable CD, but all attempts to copy or create files there end similarly:

```
openw, 1, 'e:\test.out'
```

```
% OPENW: Error opening file. Unit: 90, File: e:\test.out
```

```
Incorrect function.
```

I figure it will be a spawn or .dln type of solution...

Thanks.
