Andrej,
see event.modifiers description in the help about WIDGET_DRAW ... there
it says:

The value in the MODIFIERS field is generated by OR-ing the following
values together if a key is depressed.

Bitmask Modifier Key

- 1 Shift
- 2 Control
- 4 Caps Lock
- 8 Alt (See Note following this table.)

--> IF ((event.press EQ 1) AND (event.modifiers EQ 1)) THEN print,
'Shift pressed at mouse click'

Regards,
Ingo
