
Subject: clipping bug in WAVE contour (?)

Hi,

I've run into a interesting problem with clipping contours in the current version of WAVE (5.0) that I don't recall existing in 4.2. Consider the following simple example:

```
d = dist(40)
contour, d                      ; case #1 -- OK
contour, d, /follow              ; case #2 -- OK
contour, d, clip=[0,0,30,30]     ; case #3 -- OK
contour, d, clip=[0,0,30,30], /follow ; case #4 -- no output
```

Cases #1-3 all work as expected. However, when trying to combine both clip and follow in the same contour command, as in case #4, I don't get anything at all. Why not? Is this a bug? Is there a workaround?

Thanks for your insights...

==Matthew
