Hi,

i know it is possible to put two images in the same "plane" and make one of two semi-transparent to allow see the second image.

My question is: Is it possible to create an image as a texture of poligon and make it be transparent in the 3D space? (transparent for other planes).

I have a program similar to "d_vectrack.pro" and i'd like my slides to be semi-transparent.

Thanks.
