Hi all,

I have some big problem to learn how to use the CALL_EXTERNAL function.
(OS=windows, IDL 5.5)
I have created my C procedure but I'm not able to call it.
I try to use MAKE_DLL in this way:

MAKE_DLL, 'myprocedure', 'myprocedure'

but IDL "writes":
"\Documents" is not an internal or external command, or an exe or batch
file.

What's my mistake?
How can I understand if IDL "see" my C compiler (Visual C++ 6.0)?

I've just searched related messages in the newsgroup, but i still haven't
found what i'm looking for.

Cheers,

Valerio
