Hi there,

I'd like to save graphics in the PICT-format. Unfortunately there is something going wrong. `read_pict` can't read the file created with `write_pict`. When I look into the routine I find that `read_pict` reads the the structure `rect` incorrectly, it finds

`rect = { 0 , 0 , -4096, -4096}` instead of `rect = {0, 0, 240, 240}`

Since PICT is a standard I ask which routine is wrong and could anybody provide me with the correct ones?

Thanks a lot,

werner.
