Hey everyone,

I need an ascii keyword value reader and I poked around the newsgroups and the publicly available libraries and didn't find anything.

I was wondering if anyone out there has one they'd be willing to give away?

You know the kind I'm talking about. Something as easy as this?

;; sample ini file.

```
indir='/input/directory'
files='file1;file2;file3'
outfiles='outfile1;outfile2;outfile3'
```

;; end sample iniini

Thanks in advance, it's all much appreciated,

Matt
