Hi,everyone

I have a set of samples that I devide into several categories according to their geographical locations. Now I want to produce a plot using some symble,say a circle filled with color,to represent each catagory and the area of the symble to represent the size of that catagory.

I know how to creat a map contour, but I don't know how to do plots on top of that.

Any help or clue will be appreciated!

Cheers,

-TL
