
Subject: IDL 6.0.x crashes on mac os x?

Posted by [GrahamWilsonCA](#) on Fri, 30 Apr 2004 22:20:51 GMT

Is anyone else having problems getting IDL to behave with Apple's X11 using object graphics? As it stands, I cannot get IDL to display fonts using David's fsc_surface program. Likewise, a while a left-click will rotate the surface on my linux machines, it crashes X11 under os x which takes IDL with it!

Exception: EXC_BAD_ACCESS (0x0001)

Codes: KERN_INVALID_ADDRESS (0x0001) at 0xc0000000
