
Subject: forcing scroll bars in widget_draw

Hi all,

is there a way to force scroll bars in a draw widget even if the draw size is smaller than or as big as the viewport (the scroll bar should be inactive then)? I would like to have that because eventually the size of the draw area will be increased, and if the scroll bars appear just then, the size of the base widget would change, which is kind of ugly.

Thanks for your help,
Benjamin
