I am trying to run this simple code:

```
static IDL_STRUCT_TAG_DEF f_tags[] = {  
    {"P", 0, (void*) IDL_TYP_INT},  
    {"Q", 0, (void*) IDL_TYP_INT},  
    {0}  
};
```

```
void* s;  
s = IDL_MakeStruct("FOO", f_tags);
```

And get "Floating point exception..."

What is wrong?

Thanks,
Sveta Shasharina
